

Introducing

La Voiture

“Enhance your life with elegance”

TARGET MARKET:

- Luxury market
- Sports car aficionado
- Upper Class groups

FEATURES:

- EV
- A.I. Technology
- Lidar

PATENT INFORMATION:

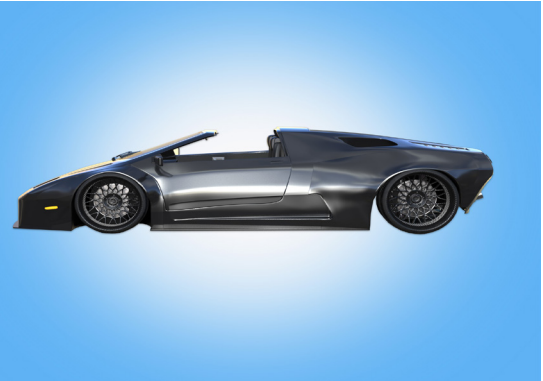

Patent pending.

SUMMARY:

La Voiture is a 2-door hardtop EV convertible operated with a smartwatch. Powered by A.I. technology, La Voiture functions using your voice and hand gestures.

When you speak to your watch, La Voiture starts the engine and drives autonomously using A.I. autopilot. With AI autopilot, it will navigate through busy streets via lidar and geolocate your position using the GPS.

Built in facial, voice, and hand gesture recognition, allows La Voiture to open the door of your car and welcomes you with an air-controlled system, all at your finger tips.

In the age of EV cars, La Voiture stands above the rest, by combining A.I. power with elegance that will drive you to the future by enhancing your life.

About the Developer

Since Eric was little, he has always loved cars and watches. After college, his rich wife bought him a Bentley Convertible and a Sky-Dweller Rolex watch, and one day he was driving and checking the time on my Rolex watch. He was thinking that he should invent a convertible car controlled by a watch; that's how he came up with this big technology genius idea. Eric contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product.
